### **DETAILED ACTION**

Claims 43-45 are pending in the case.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 43-45 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification and claims as originally filed do not provide support for the invention as now claimed: "aligning the selected segments based on homology with the template promoter to derive a first synthetic promoter having between about 60% to about 90% homology over the entire length of the template promoter". There is not sufficient written description for the above-mentioned limitations in the specification as filed. The specification does not contain any guidance or description of identifying a first synthetic promoter having between 60% to about 90% homology over the entire length of the template promoter.

Applicant is required to cancel the new matter in the response to this Office Action. Alternatively, applicant is invited to point out sections of the

Art Unit: 1636

specification which provide sufficient written support for the claims under rejection.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 43-45 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 43 and by dependence, claims 44 and 45 are vague and indefinite in the recitation of "about 60% to about 90% homology over the entire length of the template promoter", since it is not clear what is encompassed by the claim. It is not clear how to determine whether the recited homology percentages are present over the "entire length" of the template promoter. For instance, would a sequence having 60% total homology when compared with the template promoter, but having numerous gaps of non-homology of about 50 bp at intermittent regions at one general area of the sequence, be considered to meet the limitations of the claims? How does one determine whether a sequence is 60%-90% homologous "over the entire length of the template promoter", since by definition, there are regions (10-40%) which are non-homologous? For these reasons, the intended metes and bounds of the claims cannot be determined.

### ***Conclusion***

No claims are allowed.

Art Unit: 1636

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
